The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and the allied sciences received in the National Agricultural Library. Magnetic tapes supplied by the library are computer processed, using several vocabulary control mechanisms. The resulting subject and author indexes provide access to the literature in considerably less time than would be required by traditional indexing techniques.

INTRODUCTION

The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and allied sciences, based upon the indexing records prepared by the U.S. National Agricultural Library, for its CAIN (Cataloging and Indexing) computer system. Macmillan Information, a division of the Macmillan Publishing Company, Inc. prepares and publishes the Bibliography under the control of its own computer indexing system.

CONTENT

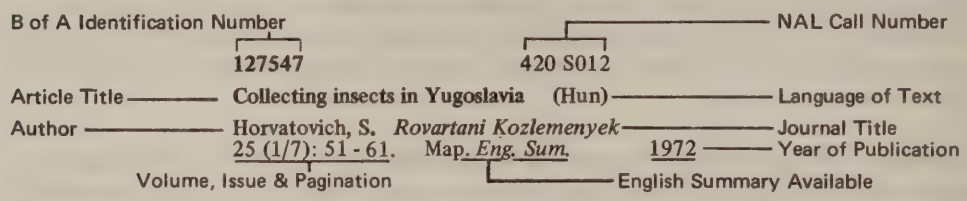
The National Agricultural Library collects literature related to agriculture from world wide sources. Publications are considered for inclusion in the CAIN System if a summary, abstract or title is available in a language in which the Library has expertise. The Bibliography includes journal articles, pamphlets, government documents, special reports, proceedings, etc. Books, new serials and other materials recently cataloged by the Library are announced in the *National Agricultural Library Catalog* published by Rowman and Littlefield.

Articles of substantial interest to the agricultural community are selected by specialists on the library staff. Editorials, letters to the editor, regular columns, and articles signed with pseudonyms or initials are not included. Indexing of articles on the processing of agricultural products is limited to those on primary processing. Generally material must have been published in the current year or the preceding year, but exceptions are made for comprehensive volumes or works of special significance to a wide audience.

The Bibliography is now divided into five sections: A main entry section, a subject index, a geographic index, a corporate author index, and a personal author index.

MAIN ENTRY SECTION

The main entry section provides full bibliographic data for the records added to the CAIN system during the preceding month by the National Agricultural Library.



Entries are assigned to one (or more if appropriate) of the broad subject categories shown in the table of contents. The array of subject categories was increased in 1972 to facilitate browsing through a small number of citations of high relevance to a particular interest. Approximately equal numbers of citations will fall into each category over a given period of time. In assigning materials to the categories, first consideration is given to the aspect, discipline or methodology involved, so that the categories will enhance information given in the title.

Within each category, entries are arranged alphabetically by journal title abbreviation. This permits rapid locating and scanning of articles from journals which are known to be relevant.

Each entry begins with a six digit identification number assigned sequentially throughout a volume year. This number serves as an identfier for the item in the various indexes. The call number of the National Agricultural Library is also noted on the first line of each entry, and should be included in any correspondence with the library. All titles are in English, using the Library's translations of non-English titles as necessary. If the text is other than English, the original language is indicated in parentheses following the title, using the following notations:

(Afr)	**Afrikaans**	**(Fle)**	**Flemish**	**(Lit)**	**Lithuanian**
(Alb)	**Albanian**	**(Fre)**	**French**	**(Mac)**	**Macedonian**
(Arm)	**Armenian**	**(Geo)**	**Georgian**	**(Nor)**	**Norwegian**
(Aze)	**Azerbaijani**	**(Ger)**	**German**	**(Pol)**	**Polish**
(Bel)	**Belorussian**	**(Gre)**	**Greek**	**(Por)**	**Portuguese**
(Bul)	**Bulgarian**	**(Heb)**	**Hebrew**	**(Rum)**	**Rumanian**
(Bur)	**Burmese**	**(Hun)**	**Hungarian**	**(Rus)**	**Russian**
(Chi)	**Chinese**	**(Ice)**	**Icelandic**	**(Ser)**	**Serbian**
(Cro)	**Croatian**	**(Ind)**	**Indonesian**	**(Slo)**	**Slovak**
(Cze)	**Czech**	**(Ita)**	**Italian**	**(Slv)**	**Slovenian**
(Dan)	**Danish**	**(Jap)**	**Japanese**	**(Spa)**	**Spanish**
(Dut)	**Dutch**	**(Kor)**	**Korean**	**(Swe)**	**Swedish**
(Est)	**Estonian**	**(Lat)**	**Latin**	**(Tha)**	**Thai**
(Fin)	**Finnish**	**(Lav)**	**Latvian**	**(Tur)**	**Turkish**
				(Ukr)	**Ukrainian**

In order to identify bibliographic elements within each main entry, note the following:

SUBJECT INDEX

The vocabulary of the Bibliography of Agriculture is derived from the indexed literature. As a result, it reflects both natural language and scientific terminology. The reader must keep this fact in mind and approach the subject index without any preconceived taxonomy in mind. For example, data on a particular member of the ACARIDAE family may be found under TICKS as well. Prevention measures will be found under ACARICIDE.

The reader should plan his search in terms of the most specific natural language term prior to searching under a scientific term. However, note that the vocabulary is an open ended one and new terms are added each month. Undoubtedly readers will be more keenly aware of crucial search terms within their own fields of research. If such terms are missing, we hope readers will notify the editor of such gaps. The Subject Index will increase its utility if there is frequent interaction between the research community and the editor.

All entries are based on single words in the title (and title enrichment when added by the library). An entry will be made whenever a title word matches a word on the authority file, which currently contains over 25,000 terms. The file is organized so that in most cases synonymous terms are grouped together under a single subject heading. Thus singular and plural forms are grouped under a single term as are grammatical variants:

PROTEINS (singular and plural variation)
I. Water, fats, ash & salt. II **Protein**
Modifying **proteins** for maximum utilization

MANAGEMENT (grammatical and term variation)
profits through nutrition and **management**
Management agricultural extension
* **Administration** of agricultural cooperatives
Techniques of **administering** apiaries in apiculture

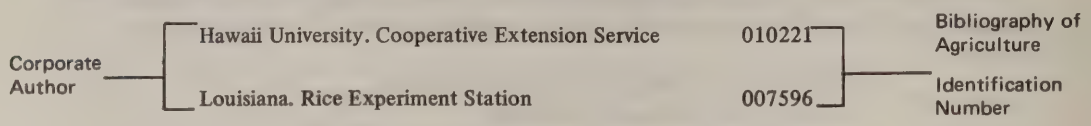
* Cross references are made to synonymous terms.

The title word on which the entry is based, appears in bold face type to facilitate rapid scanning of the index. A secondary word, which may either precede or follow the primary word, also appears in bold face type. These word pairs help provide finer access to desired term, particularly under headings which have many entries.

VIRUSES
Physical properties of blue-green **algal virus**
Venezuelan equine **encephalomyelitis virus**
Limited proteolysis of **potato virus X** by
with sugar beet tolerance to **virus yellows.**

If a search is required which related to a general term such as an ACID it would be preferable to search under the specific type of ACID. Very often a specific acid has already been established as a subject term. However new types of acids, or viruses or plant varieties will not have been identified in the the thesaurus and under such circumstances, searching under the more general term would prove more fruitful.

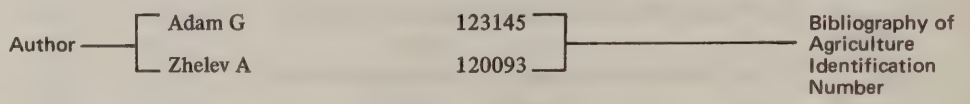
We have changed the format of the table of contents to reflect the identification number ranges of each of the main entry categories. Thus, the reader can check the category under which a subject entry falls, prior to verifying it in the main entry section.



The asterisk line: * * * * * *
Occasionally the reader will encounter a series of asterisks in place of title data under a term, followed by the B of A identification number. This line indicates the presence of material which is part of a series and the title data is identical to that immediately above the asterisk. The identification number given is the last entry in the series which has been entered consecutively within a particular category.

GEOGRAPHIC INDEX

As part of our goal of constantly increasing access to the literature, we have added a geographic index. This index is a direct alphabetic listing of all place names which have been indexed in association with the title. Obviously not all titles will have geographic entries. The indexing division of the National Agricultural Library will add geographic descriptors wherever it is germane to the subject of the article.



CORPORATE AUTHOR INDEX

Readers will note that the corporate author index is considerably enlarged. We are now able to indicate authorship of the publications of the State Agricultural Experiment Stations and Extension Services. The full corporate citation is given, followed by the six digit identification number referring to its appropriate main entry.

AUTHOR INDEX

All personal authors (to a maximum of ten for each citation) are included in the index. Entries are made by last name and initials, followed by the six digit identification number referring to the bibliographic data in the main entry section.

AVAILABILITY OF REFERENCES CITED

Most of the current publications of the Department of Agriculture, and publications issued by the State Experiment Stations and the State Agricultural Extension Services, may be obtained free of charge by applying directly to the issuing agency. The National Agricultural Library does not distribute them, nor does the publisher.

Users who wish to obtain full text for citations should first utilize the resources of their local libraries. For material which is not readily available from other sources, users may request material from the National Agricultural Library. Such requests must include the complete citation as well as the Library's call number. Microfilm or electrostatic copies of documents may be purchased from the Photocopying Service of the National Agricultural Library, U.S. Department of Agriculture, Beltsville, Maryland 20705. Copy charges are:

Microfilms:	$1.00 for each 30 pages or fraction copied from a single article or book
Electrostatic Copies:	$1.00 for each 10 pages or fraction copied from a single article or book.

Payment must accompany the order. Cash, library coupons, check, or money order drawn to the National Agricultural Library, USDA, are acceptable. Payment for orders originating outside the United States should be made by international money order or draft on an American bank, or by UNESCO book coupons. Library coupons, valued at $1.00 each, may be purchased in any quantity from the Library's Photocopying Service.

Poultry meat production to fight protein malnutrition. Panda, B *Indian Farming* 22 (4): 46-47. July 1972

021271 389.8 IN26
Finding out non-permitted substitutions in meat products by chemical examination in laboratory. (Rum) Popescu, N; Brinzac, V; Stanescu, I *Indus Aliment (bucuresti)* 23 (5): 258-259. Eng. Sum. May 1972

021272 383 AS7
Maillard reaction seen from nutritional angle. I. Domain of Maillard reaction. [Amino acids, proteins, sugars]. (Fre) Adrian, J *Indus Aliment Agr* 89 (9/10): 1281-1289. Ref. Eng. Sum. Sept/Oct 1972

021273 44.8 F33
Nutritive value of milk & milk products (a biochemical view). (Por) Freitas, J de *Inst Laticinios Candido Tostes Rev* 26 (158/159): 35-37. Ref. Sept/Dec 1971

021274 307.8 J82
Effects of fresh & used hydrogenated soybean oil on reproduction & teratorlogy in rats. [Diets]. Nolen, G A *J Amer Oil Chem Soc* 49 (12): 688-693. Ref. Dec 1972

021275 389.8 J82
Dietary protein quality measured by in vitro protein synthesis in rat skeletal muscle ribosomes. Von Der Decken, A; Omstedt, P T *J Nutr* 102 (12): 1555-1562. Ref. Dec 1972

021276 389.8 J82
Role of 1,25-dihydroxycholecalciferol in calcification of bone & maintenance of serum calcium concentration in rat. Tanaka, Y; Frank, H; DeLuca, H F *J Nutr* 102 (12): 1569-1577. Ref. Dec 1972

021277 389.8 J82
Dietary protein & utilization of carotene or retinyl acetate in rats. Kamath, S K; MacMillan, J B; Arnrich, L *J Nutr* 102 (12): 1579-1584. Ref. Dec 1972

021278 389.8 J82
Protein requirements of man: variations in obligatory urinary and fecal nitrogen losses in young men. Scrimshaw, N S; Hussein, M A; Murray, E; Rand, W M; Young, V R *J Nutr* 102 (12): 1595-1604. Ref. Dec 1972

021279 389.8 J82
Comparison of effects of dietary calcium & magnesium depletion on renal glucose-6-phosphatase activity of rats fed high protein & high carbohydrate diets. Suzuki, H; Fuwa, H *J Nutr* 102 (12): 1615-1621. Ref. Dec 1972

021280 389.8 J82
Nitrogen balances of adult human subjects who consumed four levels of nitrogen from a combination of rice, milk & wheat. Clark, H E; Howe, J M; Magee, J L; Malzer, J L *J Nutr* 102 (12): 1647-1654. Ref. Dec 1972

021281 389.8 J82
Effect of purification & cellulase treatment on hypocholesterolemic activity of crude konjac mannan. Kiriyama, S; Ichihara, Y; Enishi, A; Yoshida, A *J Nutr* 102 (12): 1689-1697. Ref. Dec 1972

021282 448.8 J827
Sociocultural influences on vitamin A deficiency in a rural Malay community. [Human nutrition]. Chen, P C Y *J Trop Med Hyg* 75 (12): 231-236. Ref. Dec 1972

021283 389.9 K953
Recommended dietary allowances for wheat flour & other non-rice foods. (Kor) Kim, D J *Korea Fao Ass Bull* 14 (12): 15-21. Dec 15, 1972

021284 389.9 K953
Your dietary habit. (Kor) Inami, T *Korea Fao Ass Bull* 14 (12): 39-40. Dec 15, 1972

021285 TP983.A1K682
Right nutrition--part of beauty treatment. (Ger) Lehmann, H *Kosmet Fachz* 22 (244): 34-36. Dec 1972

021286 389.8 N142
Comparison of nutritional situations & physical conditions of populations of Bulgaria & German Democratic Republic. 3. Comparison of quantitative & qualitative satisfactions of nutrition requirements. (Ger) Demireva, M; Mohr, M; Milev, N *Nahrung* 16 (4): 321-331. Ref. Eng. Sum. 1972

021287 389.8 N142

025098 443.8 C16
Multiple aneuploids from interspecific crosses in Solanum: fertility & cytology. Lee, H K; Kessel, R; Rowe, P R *Can J Genet Cytol* 14 (3): 533-543. Ref. Sept 1972

025099 443.8 C16
Genetic analysis of seed size in pigeon pea Cajanus cajan. Sharma, D; Singh, L; Baghel, S S; Sharma, H K *Can J Genet Cytol* 14 (3): 545-548. Sept 1972

025100 443.8 C16
A revision of mutation breeding procedures in Arabiodopsis based on a fresh analysis of mutant sector problem. Harle, J R *Can J Genet Cytol* 14 (3): 559-572. Sept 1972

025101 443.8 C16
Leaf esterase isozymes in Avena & their relationship to genomes. Craig, I L; Murray, B E; Rajhathy, T *Can J Genet Cytol* 14 (3): 581-589. Ref. Sept 1972

025102 443.8 C16
Chromosome relationships of Trifolium uniflorum to Trifolium uniflorum to Trifolium repens & Trifolium occidentale. [White clover]. Chen, C C; Gibson, P B *Can J Genet Cytol* 14 (3): 591-595. Ref. Sept 1972

025103 443.8 C16
Genetic analysis of coleoptile elongation in barley. Verma, M M; Virk, D S; Singh, S B *Can J Genet Cytol* 14 (3): 597-600. Sept 1972

025104 443.8 C16
Interrelationship of genetic & maternal control in a selected population of Lolium perenne. Hayward, M D; Lawrence, T *Can J Genet Cytol* 14 (3): 601-607. Ref. Sept 1972

025105 443.8 C16
Genome relations between an intraspecific Paspalum dilatatum hybrid & two diploid Paspalum species. Burson, B L; Bennett, H W *Can J Genet Cytol* 14 (3): 609-613. Ref. Sept 1972

025106 443.8 C16
Activity & relative mobility of peroxidase isoenzymes in genotrophs & genotypes of flax (Linum usitatissimum L.). Fieldes, M A; Tyson, H *Can J Genet Cytol* 14 (3): 625-636. Ref. Sept 1972

025107 443.8 C16
Cytogenetic studies of meiotic abnormalities in Collinsia tinctoria. II. Desynapsis. Mehra, R C; Rai, K S *Can J Genet Cytol* 14 (3): 637-644. Ref. Sept 1972

025108 443.8 C16
Avena damascena: a new diploid oat species. Rajhathy, T; Baum, B R *Can J Genet Cytol* 14 (3): 645-654. Ref. Sept 1972

025109 443.8 C16
Effect of adenosine triphosphate on mitomycin C-induced aberration yield in Vicia faba. [Broadbeans]. Bempong, M A; Newsome, Y L *Can J Genet Cytol* 14 (3): 655-660. Ref. Sept 1972

025110 443.8 C16
Genetic basis for difference in seed weight between Thatcher & Selkirk wheats. Talukdar, B S *Can J Genet Cytol* 14 (3): 667-673. Sept 1972

025111 443.8 C16
Phylogenetic affinities in Triticinae studied by thin-layer chromatography. Dass, H C *Can J Genet Cytol* 14 (3): 703-712. Ref. Sept 1972

025112 443.8 C16
Two cytoplasmically inherited chloramphenicol resistance loci in yeast (Saccharomyces cerevisiae). Kleese, R A; Grotbeck, R C; Snyder, J R *Can J Genet Cytol* 14 (3): 713-715. Sept 1972

025113 443.8 C16
End-to-end attachment of haploid chromosomes of Ornithogalum virens. Ashley, T; Wagenaar, E B *Can J Genet Cytol* 14 (3): 716-717. Sept 1972

025114 7 R31
New advances in hybrid sunflowers. Enns, H *Canada Agr* 17 (4): 11. Fall 1972

025115 442.8 C99
Karyotype changes in intersubgeneric hybrids of Rumex. Singh, R B *Cytologia* 37 (3): 377-381. Ref. Sept 1972

025116 442.8 C99
Cytogenetics of 16 chromosome plants in pearlmillet. Pantulu, J V; Manga, V *Cytologia* 37 (3): 389-394. Sept 1972

025117 442.8 C99
Chromosome behaviour in colchicine induced autotetraploids of Cicer arietinum L. [Chickpeas]. Phadnis, B A; Narkhede, M N *Cytologia* 37 (3): 415-421. Ref. Sept 1972

025118 442.8 C99
Mutagenic studies of gamma rays on Oryza sativa L. [Rice]. Raj, A Y; Raj, A S; Rao, G M *Cytologia* 37 (3): 469-477. Ref. Sept 1972

025119 442.8 C99
Mitotic consequences of radiation induced chromosome breaks in Lathyrus sativus & Vicia ervilia. [Vetch]. Shaikh, M A Q; Godward, M B E *Cytologia* 37 (3): 489-495. Ref. Sept 1972

025120 442.8 C99
Meiotic consequences of radiation induced chromosome breaks in Lathyrus sativus & Vicia ervilia. [Vetch]. Shaikh, M A Q; Godward, M B E *Cytologia* 37 (3): 497-505. Ref. Sept 1972

025121 511 AK147D
Cytogenetic aspects of selecting plant stock material for breeding. (Rus) Abdullaev, I K *Dokl Akad Nauk Az SSR* 28 (1): 63-66. 1972
